

Lady Allyson's Minuet By Robert Vandall

The Clavinova has a special feature called "Full Keyboard", and Lady Allyson's Minuet is the perfect song to use this feature. Load the registrations into the Clavinova, and press Registration #1. You can also set the Clavinova up to change registrations with your pedal if you prefer.

Make sure the Sync Start is on the accompaniment section. Start by playing a "G" chord, and the Clavinova will play a 4 measure introduction. After the introduction is complete, begin to play the song as written. At measure 8, if possible, ignore the rest in the left hand, and play the notes on the downbeat. It make for a more pleasurable sound.

Change to registration #2 the beat before measure 17. Change to registration #3 on the last beat before the *D.C al Fine*. Changing the registration the beat before makes a smoother transition.

After you have played the last note, press the Ending #2 button, and the Clavinova will play an beautiful ending for you.

Enjoy!
